City of a Letter from a Gentleman at Albany, to his Friend in om bir New York, dated 5th of May, 1746. inched i "SIR.

E VERY Letter you receive from me this Summer, I fear, will be filled with shocking Accounts of Burnings n Ilaa: and Murders committed by the Indians. — A few Days ago a Party took two Negroes Prisoners at Stonearabia, one belonging o Levinus Winne, the other to the Heirs of Mrs. Wendell.

Force. 60,000 A Day or two afterwards we heard from Kinderhook, (a Place Allie, to Miles South of this City) that the Indians had burnt the loufes and Barns of Tunis Van Slyck and Peter Vosburgh, nilitary and killed their Cattle; but happily thoe Families had re- support such an Expence which I will readily grant : Should agairt noved that Day into a little Fort, which is built by the Neightourhood at their own Expence, without the least Affistance Massachusetts and Connecticut, to join us in the Expence of efrom the Public that ever I heard.

of it: Should the French become Masters of this Place, what dreadful Confequences have not all the Colonies to expect from fuch an Event; the Six Nations will then declare in their Favour, and will it not be in their Power to harrafs all the Settlements in the English America; with the Assistance of the Ottowaes, Millifagoes, and other far Nations, who are very numerous, by their continual Inroads! I know full well that many People with you will think this to be a Chimera, and look upon us as a dispiritless Pack of Poltroons; but what would they have us to do? We go in pursuit of the Enemy whenever any Mis-

chief is done near us, and leave our Wives and Children very much exposed; for we are not sufficient in Numbers to defend our selves and act offensively too. The last War indeed we carried into the Enemy's Country, and even took Prisoners under the Walls of their Fortifications; but at that time we were affisted by the Indians; should they join us now, I doubt not but the Spisits of our Fathers would be revived in their Sons - I am lenfible; that many of our Misfortunes are owing to Divisions; but if ever there was a Time that a fincere and nearty Agreement amongst our selves was absolutely necessary, it is now. -- But what Itiall I say, there is a Part of Mankind out of a Love of Cavil, or an Affectation of superior Judgment, find Fault with every thing that is done, for no other Reason but because they are not in the Administration, and are not confulted, or because Things are generally approved of by

those they look upon to be what they call of another Party and leeks Applause from that which ought rather to raise Contempt... " Is this a Time to cast Reproaches for what is past, or to cherish Faction? Ought we not rather to take Care for the Future, and without Delay heartily unite to oppose the common-Enemy? Shall we quietly suffer one Frontier to be taken after another, the poor Inhabitants to be barbarously murthered by: inhuman Savages! Ought not this to rouse us from our Lethargy? I wish that People in the other Counties were sensible of our Miseries, and then I am certain they could not but be so touched with our Misfortunes, as that nothing would alleviate

them, till they faw fomething effectually done to protect us; which I think can be only done by an Affiffance from the different Parts of the Government; engaging the Indians to declare in our Favour, and a strong Fort at the Carrying place garrison'd with at least 800 Men. "You will fay; that our Province is not in a Capacity, to we therefore not endeavour to prevail on our Neighbours in The next alarm we had, recting and maintaining such a Fort, fince we may demonstrate
